Represents 3 of 9 primary metrics. Based on average performance of rated products/product families.

## JANUS et Cie Overview

With a commitment to environmental stewardship, JANUS et Cie pioneered the development of recyclable synthetic woods made from post-consumed plastic, recyclable synthetic fibers that are clean to manufacture and promotes renewable natural materials of rattan and plantation teak. The brand's aluminum products are 100% recyclable and powder coated in a process that contains no VOC's. With mindful construction methods and sustainable materials, JANUS et Cie provides beautiful, functional products with long life cycles.
